

Accessibility Roadmap

Vendor/Product Information

Vendor Name	IEEE Xplore Digital Library
Product Name	IEEE Xplore Digital Library
Product Version	7.46
Completion Date	31 October, 2023
Contact Name/Title	Rick Blount, Web Content Manager
Contact Email/Phone	r.blount@ieee.org

Specific Issues

Issue Description	Current Status (Open, Closed, I/P)	Disposition (Planned, Deferred, I/P)	Remediation Timeline	Available Workarounds	Comments
The date filter on Search and Browse pages is not labeled correctly. It has a slider element with no alternative. We are removing the slider element and will replace the filter with simpler radio buttons (instead of a toggle) and have the year range be filtered by entering numbers in text fields. ARIA labels will be added.	I/P		Q4 2023	Enter dates in the text boxes to apply date filtering.	
The bottom-of-page pagination / navigation numbers on Search, Browse, and Table of Contents pages were inadvertently removed from the tab order. We will restore them to be in the tab order.			Q4 2023	Use the "Items Per Page" dropdown in the action bar to show up to 100 results. This can be set as the default view when signed in to an IEEE Personal account (Go to My Settings > Preferences). Use the Search Within bar to find more relevant results.
